James D. Power IV Joins Service Repair Solutions Board of Directors

Las Vegas, NV, October 21, 2008, – Service Repair Solutions, Inc. (SRS), <http://www.servicerepairsolutions.com>, a leader in providing innovative information solutions for the auto service and repair industry and the parent company for MPi, Identifix and iATN, today announced that James D. Power IV, Senior Vice President and Strategic Advisor at J.D. Power and Associates, has joined the SRS Board of Directors.

One of the industry's most well known experts, Power brings to SRS a wealth of credentials derived from over two decades of hands-on experience. As the son of J. David Power III, founder of J.D. Power and Associates, Jamey literally grew up with the business. He, like the other Power children, worked at the company in a variety of jobs throughout their early school years and into college. Power joined the company as a professional employee in 1990. Most recently, he was Senior Vice President and General Manager—International Operations. During this period the international business grew to over 20% of the company's overall business and it established offices throughout Asia, Europe and Canada.

In the mid 1990s, Mr. Power moved to Michigan to direct the J.D. Power and Associates regional office in Troy, MI. There he developed business with the automotive manufacturers, the commercial vehicle manufacturers, automotive finance companies and a variety of automotive suppliers. He also managed the Canadian operations and established the first office in Toronto in 1996.

Mr. Power launched his career at the advertising agency Foote, Cone and Belding as a key member of the account management team responsible for Mazda's national marketing and communications program. He fulfilled a dream to work directly for an automobile company and in the late 1980s he joined the Chevrolet Motor Division of General Motors Corporation. There, he was the Geo marketing development manager for the region covering Southern California, Arizona, southern Nevada and New Mexico.

"We are extremely fortunate to have Jamey join our Board of Directors. His deep experience at J.D. Power, a data-related business, combined with his talent for and knowledge of international growth and the automotive industry in general, will bring important insight and guidance as we continue to realize our vision of revolutionizing the delivery of service and repair," commented Les Silver, CEO/President of SRS.

SRS has long relied on input from industry leaders, and invested in products and services that make significant impact in the delivery of automotive service and repair. Today, more than 100,000 technicians access data and services from SRS through its wholly owned subsidiaries:

- Mobile Productivity, Inc. (MPI) has launched the World Class Inspection™ program which significantly improves customer satisfaction, management processes, and revenue per repair order for dealership service departments.
- Identifix, Inc. manages the automotive aftermarket's largest professional hotline and Direct-Hit, the industry-leading database and online web service for real-world information authored by certified master technicians to help "find fixes faster™."
- International Automotive Technicians' Network, Inc. (iATN) is an online community with a mission to promote the continued growth, success and image of the professional automotive technician by providing a forum for the exchange of knowledge and the promotion of education, professionalism, and integrity.

Commenting on his appointment Power stated, "At this particular time in the automotive industry, the need has never been greater for solutions that provide

significant increases in profits, efficiencies and customer loyalty. I am proud to continue my commitment to the industry by joining SRS and its affiliates in their important work to help overcome these challenges.”

About Service Repair Solutions, Inc:
